**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 7-11 are rejected under 35 U.S.C. 102(e) as being anticipated by Sasame et al. (US Pat. 6,832,923).

Regarding claims 7-11, Sasame et al disclose a circuit board securing device comprising: a base section 172 including a groove 178 formed by a first and second wall; a securing member 174 that is received by the base section 172; a first component 101 configured to move the securing member 174 longitudinally within the groove 178 of the base section 172; a second component 102 configured to keep a second end of the securing member 174 within the groove 178 of the base section 172; and one or more force-producing devices 170 for moving the securing member 174 closer to the first wall of the base section 172 as the first component 101 is adjusted wherein the first component 101 comprises a screw 50a, 50b received through a slot in the base section 172 and into a threaded cavity of the securing member 174 wherein the second

Art Unit: 2835

component 102 comprises a set screw 50a, 50b received through a threaded cavity of the base section 172 and a slot of the securing member 174 wherein the securing member 174 comprises one or more lateral support devices wherein the force-producing devices 170 comprise a plurality of ramps located on the base section and the securing member 174.

***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 12 is rejected under 35 U.S.C. 103(a) as being unpatentable over Sasame et al. (US Pat. 6,832,923) in view of Perotto (US Pat. 3,418,533).

Regarding claim 12, Sasame et al. disclose all the subject matter of the claimed invention except for the securing member is a monolithic. However Perotto discloses the monolithic board (see Perotto 's column 6, line 75). Therefore, it would be obvious to one of ordinary skill to modify monolithic board of Perotto into Sasame et al's circuit board in order to be good in connection within electrical and mechanical design.

***Allowable Subject Matter***

3. Claims 1-6 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: the prior art fails to show that a structure component; and at least two circuit board securing devices coupled to the structure component.

### ***Conclusion***

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
